

Service Platform for
the Internet of Things

Built on Open Standards and Open Technologies

„To try and fail is at least to learn;
to fail to try is to suffer the
inestimable loss of what might
have been“

Chester Barnard

American Business Executive, 1886 – 1961

What is **VelisSphere?**

Don't worry about that name...

It's a bit like a social network –
without the social.

It's somehow like network management –
without the network.

**It's about IoT –
and four simple things:**

Connect

Interact

Manage

Analyze

Connect Devices and Services,
regardless of their type, origin and
location.

Connect

Let them interact with each other, based on your set of rules. Share your devices with other people, and let them interact with their devices.

Interact

Manage, monitor and maintain them –
individually, in groups, or as abstract
virtual devices

Manage

Analyze device behavior, data streams and patterns, either through our web based interface or connections to 3rd party solutions

Analyze

What are our **Key Principles?**

Open Standards (AMQP, MQTT, ReST...)

Flexible Deployment (Cloud, Fog, On Premise)

Flexible to Extend (open source SDK/APIs)

Easy-to-Understand, Easy-to-Use

Affordable Consumption Model

Highly Secure

When will it be
Available?

BETA: TODAY!

Where can I **Test Drive It?**

VelisSphere is in BETA now -
